Jan 20, 2018 I was testing Navimag and in my solution I used 1703 cycle as I have downloaded simbrief flightfactor 767 it's working perfectly . Dec 4, 2017 but in the schematic he use the old svg for the 737- is used the Navimag1703. Nov 20, 2018 Is not a game breaker. I'm using the cycle 1703 of Navimag and all other planes is working . [FS9 /P3D /X-plane] flightplan load cycle 1703 FACTOR 767's Oct 13, 2018 Similarly, in my case, a lack of AIF should not affect the cycle of a trainer, as I am running the latest Simbrief for flightfactor 767 . May 11, 2018 In-game: When I view the screenshots in P3D of the 737- there is a small sign on the bottom left side, that looks like the flaperon for that side. I can remove it but it does not go away. I cannot see it in X-Plane 11. Help. Aug 30, 2018 I'm having trouble with flight factor when I'm trying to load a ScenicAir 737 737 NG, the passenger manifest is fine I have it there. I have downloaded flight factor 737 in the simbrief, I have found the correct cycle. I have tried to load it and it keeps coming up with a message that the cycle is not compatible with what is loaded. The cycle that I want to load is the Navimag 1703 (Simbrief), not the flight factor. I have not found a way to make it show on the airplane. It comes up with a warning that my airplane should be compatible with this cycle. I have gone through the menus and looked for the compatibility not finding any thing. Could someone please help me? Sep 20, 2017 Could help, how to update Navimag cycle for FlightFactor 767 to cycle 1703. It's not allowed to mix cycles. answer the question. You have to consider 3 things when dealing with technology The brains - who they are, where they are, what they do The body - where it is, what is required of it The environment - where it is, what is required of it You have to think about where your will be controlling the device - is it going to be where you are now,
