I Will Show You Exactly! In May 2019, healthcare workers began spreading the coronavirus disease 2019 (COVID-19) in Wuhan, China. As of July 7, COVID-19 has infected more than 460,000 people globally with \>22,000 deaths.[@bib1] The death rate from COVID-19 in China and some other countries has been much higher than the death rates from other infectious diseases during the same period, especially among the elderly and individuals with preexisting comorbidities. The evolving situation in China indicates that severe clinical complications frequently occur in critically ill COVID-19 patients. However, the clinical features of COVID-19 in adult intensive care unit (ICU) patients have not been well understood. Ic Control Center of China officially categorized COVID-19 in adult intensive care unit (ICU) patients have not been well understood. Ic Control Center of CovID-19 according to the disease severity and death rate of patients. Ic@bib2] Grade 1 is defined as mild patients with positive nucleic as mild patients with positive nucleic as patients were often admitted to the ICU and frequently required mechanical ventilation. Notably, data from the Chinese Association of Critical Care Medicine showed that the
